## A sunkissed, even, no-fuss tan in 2 mins.

<insert small pic of before and after face>

No-one wants to smell like weird biscuits that only your grandma has. And most fake tan products smell like that.

Plus, most tanning products are uneven, patchy and orange. And they're full of harmful parabens.

**We've created a natural tanning product that's not only even, smooth, but will leave you feeling like a glowing goddess.**

**Plus, it's kind to animals too - totally vegan and certified by PETA.**

**You can apply it in the comfort of your home in just 2 MINUTES - perfect for a glam night out or even before work.**
